Fleet Commander™ *Online*

Control Fleet Expenses with the Industry's Leading Fleet Management Tool

Smart organizations are always looking for better ways to manage and control fleet expenses.

Our industry leading fleet management solution, Fleet Commander™ *Online*, provides comprehensive fleet-related data to analyze expenses, establish controls and integrate expense information with your key business programs enhancing the quality of your planning and decision making.

Fleet Commander™ *Online* is a secure, web-based fleet and fuel management program that provides total access enabling users to observe, update, track and manage fleet operations and U.S. Bank Fleet Card accounts. Complete level III data capture gives fleet administrators all the information needed to manage fleet and account activity proactively.

Fleet administrators have the ability to customize the control and features necessary to manage their fleet in greater detail. Administrators can also evaluate costs, set cost controls, customize reports and make informed decisions with the click of a mouse. Real-time alerts and account maintenance features enable administrators to take quick action to minimize the risk of excessive or improper card use. Access to Fleet Commander™ *Online* is through a secure, web-based browser network that requires user names and passwords. Administrators can also access Fleet Commander via our optimized network platform for mobile access through any smartphone or PDA device.

Features Designed to Serve Unique Fleet Needs

Effective fleet expense management is critical to running your business and requires tools that enable you to easily control, and keep track of all fleet expenses. Fleet Commander™ *Online* features are designed with your needs in mind based on our extensive knowledge of fleet requirements and our years of fleet industry experience.

Some of the capabilities that enable effective control of fleet and fuel expenditures include:

- Real-time account maintenance including card creation, cancellation or replacement and PIN management
- Real-time authorization tools to establish controls by fuel and other expenses, dollars or transactions by day, week or month, merchant MCC and more
- Manage and authorize controls by driver or vehicle type or class
- Quickly managing entire groups with similar control requirements—one change alters the entire group's profile
- Online bill payment and presentation via ACH bill pay
- Comprehensive, customizable reports including transaction, card, driver, vehicle, exception and inventory reports
- Advance Internet banking security features

Account Maintenance

Fleet Commander™ *Online* allows fleet administrators to:

- Control cards at both a driver and vehicle level
- View statements and invoices
- Make payments online
- Add, cancel and replace cards, drivers and vehicles 24/7.

The U.S. Bank Fleet Card is accepted in all 50 states at more than 230,000 fuel and maintenance locations. With new locations being added every month, the Voyager® network merchant locator provides companies with search tools to plan and locate preferred merchants and get detailed maps and driving directions.

Fuel Prices

The Fleet Commander™ *Online* fuel prices link can help drivers plan their routes and check prices before committing to a stop. Our network obtains transaction records of various gas prices from points throughout the country making it easy to locate both the lowest and average gas prices anywhere in the U.S.

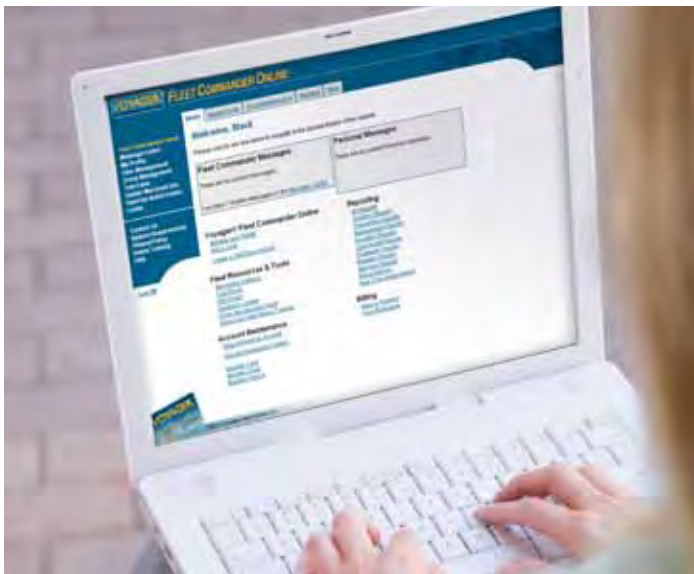

Valuable Business Intelligence to Run Your Business

Fleet Commander™ *Online* provides a wealth of fleet transaction information that can be utilized to track and analyze fleet expenses from standard or customizable reports. Valuable information can be used to track vehicle performance, overall spending, and transaction and exception trends. Information is obtained in a format that best suits the user including Excel, HTML, and PDF, CSV or Tab-delimited formats.

Management Reports

Management reports provide essential tools to spot misuse and transaction trends. Fleet administrators can track every dollar spent in a variety of categories:

- Dollars by merchant
- Non-fuel purchases
- Cards with high gallons and highest number of transactions
- Multiple purchases per day and purchase methods
- Fuel economy by vehicle ID or make and model

Transaction Reports

Every transaction made on the fleet card captures 68 separate data elements. These elements can be used by fleet administrators to create customizable transaction reconciliation and vehicle management reports giving significant flexibility for users to drill down into transactional data and create reports using all data elements. Users can define column appearance, naming, sort order, date range and specific account or organization levels.

Inventory Reports

Inventory reports allow fleet administrators to assemble real-time inventory information to help make important card, vehicle or driver decisions. The individual card, vehicle and driver profiles generated in this series of reports offer organized detail to help manage your fleet.

Exception Reports

Exception reports identify program variances and quickly help administrators identify employee abuse or misuse and spot transaction trends. Possible exceptions include:

- Vehicle fuel capacity variances
- Purchase pattern discrepancies
- Product variances

Standard exception reports provide information on high dollars for non-maintenance transactions, cards with high gallons, cards with non-fuel purchases, cards with highest number of transactions along with purchase methods and cards use based on percent of limit. You can also customize exception reports to meet your business parameters.

Billing Reports

Billing reports provide information on all program transactions including any payments and adjustments.

All report types can be saved based on specific criteria and scheduled daily, weekly, monthly or quarterly report generation. Users will receive an email notification when a report has been generated.

Security and Reliability Rank High with Fleet Commander™ Online

Security is very important to anyone providing information over the Internet. The Fleet Commander™ Online website runs through secure Internet firewalls with the industry's most advanced Internet security features. You can count on the reliability of Fleet Commander™ Online starting with our solid-system architecture including full system redundancy that is closely monitored by our 24/7 technical support team to ensure a 99.5% overall system performance.

Training Made Easy

Fleet Commander™ Online is designed to be an easy to use, intuitive tool that requires very little instruction to become proficient. To help get you started, we offer several options for training including a web-based training course or instructor-led webinar training course that are scheduled throughout the year. To learn more about training visit: www.usbpayment.com/training.

The Voyager Network Difference

A leading card network for fuel and maintenance merchants, Voyager is specifically designed to serve the needs of automobile and light truck fleets. Voyager acceptance is found on gas pumps and cash registers of more than 230,000 retail locations in all 50 states. The network, which is owned and operated by U.S. Bank, is designed to capture fleet management information beyond the abilities of other card networks.
